LIST OF LINING OUT STOCK
GRAFTS, ROOTED CUTTINGS.
FOR
FALL 1940 — SPRING 1941

Gentlemen:

I herewith send you my list of lining out stock for Fall 1940 and spring 1941; I must draw your attention to the different items of lyr grafts from 4" pots which make ideal stock for fall planting; by reason of our late season last spring many of us could not get to lining out some stock in time and to wait till next spring one will lose a year, so why not plants some of that stock now. There also is listed a good assortment of Japanese Yew varieties in many sizes and other cuttings and plants of interest.

If you have not already bought from me please give me a try and I will do my best to serve you in the right way.

yours truly

John Vermeulen.

GORDONIA "Franklinia"; This is one of the best flowering shrubs in the garden. Its pure white cup like flowers with its yellow stamens stand out clearly against the shiny green foliage which turns a beautiful Autumn red. The flowers are very fragrant and appear from early August till frost. It transplant well bear root but must be soaked well after planting. I went undamaged through 16 below in 1934

THE TAXUS OR YEWS

There is no doubt that at the present time there is no better evergreen in this country than the different hardy varieties of Yews. They can be planted almost anywhere and can stand all kind of weather including dry and also grow well in the shade. They can be used for all kinds of planting and make the finest hedges. I am offering several varieties all hardy; also 2 new varieties brought in the trade by me several years ago and which are well tried by now and are well recommended.
